

DALA | THE PERFECT COMPLEMENT TO ANY DEDON COLLECTION

The DALA collection by Stephen Burks has drawn widespread attention not only for its unique design, based around an external construction of expanded aluminum mesh, but for the revolutionary new DEDON fiber we've woven through it, created from recycled food-and-drinks packaging.

Now, two new accessories extend the DALA concept even further. Designed using the same mesh structure and environmentally-friendly fiber as the collection itself, the DALA planter and lantern are the perfect complement to any DEDON collection.

Available in three sizes in our Stone fiber color, the lantern features an open weave to let the candlelight shine through (clear tubes protect the candles from drafts) and comes with elegant, man-made leather handles for hanging it or placing it on the ground.

Available in two sizes and two fiber colors, Stone and Grass, our new DALA planter brings subtle sophistication to any outdoor living room. It features a rotomolded internal pot and the same adjustable gliders as the DALA furniture pieces.
