

# ORBIT | A RETREAT FOR THE SENSES

And without a doubt, ORBIT is different. The futuristic design breaks with our conventions and redefines the concept of furniture. You want to sink into the large, round sofa-islands, and you can. There is enough room to be cosy, stargaze or enjoy the sunshine together. The easy gliding casters make it a breeze to move ORBIT according to your mood or the position of the sun.

An additional innovative, as well as good idea is the cloth canopy. One twist of the wrist – and you have a luxurious roofed beach chair that offers protection from wind, sun and prying eyes.
